Summary

Analytics Engineer with 3+ years of experience building automated data pipelines, analytics-ready datasets, KPI frameworks, and self-service reporting using SQL, Python, Alteryx, BigQuery, Power BI, and Tableau.

Skills

- **Data & Analytics:** SQL, Python, data modeling, ETL/ELT, metric design, KPI development, data quality validation
- **Platforms & Databases:** BigQuery, SQL Server, IBM i / DB2, PostgreSQL, Alteryx
- **BI & Reporting:** Power BI, DAX, Tableau, Looker, Looker Studio, Excel
- **Automation & Integration:** REST APIs, PowerShell, VBA, workflow automation

Experience

Dollar Tree | Chesapeake, VA | 04/2025 – Present

Data Analyst | Analytics Engineering

- Design and maintain analytics pipelines across IBM i/DB2, SQL Server, BigQuery, and Alteryx, transforming complex operational data into trusted datasets powering Supply Chain reporting and executive decision-making.
- Rebuilt the enterprise DC Scorecard data model and scoring framework to calculate period-based KPIs, standardized performance ratings, outlier handling, and performance targets across the distribution network.
- Re-architected the Supply Chain Tableau portal using platform usage analytics to prioritize high-value dashboards, identify low-use content, and improve discoverability of self-service reporting for hundreds of users.
- Build scalable Alteryx workflows processing multi-million-row datasets and reusable extraction patterns, including chunked BigQuery processing to overcome API limitations and support high-volume analytics.
- Build analytics datasets and Power BI and Tableau reporting solutions for enterprise distribution center KPIs, including trailer dwell time, yard and reserve capacity, cases per hour, OSHA performance, fill rate, shrink, and employee turnover, standardizing KPI measurement across the distribution network.
- Automate production monitoring and reporting processes using APIs, PowerShell, SQL, and scheduled workflows, reducing manual troubleshooting and improving reliability of business-critical analytics.

Cruise | San Francisco, CA | 01/2023 – 12/2024

Data Analyst | Quality Analytics

- Built automated Python and SQL workflows to streamline recurring data preparation and reporting processes.
- Developed reusable SQL transformations using CTEs, window functions, complex joins, and validation logic to produce reliable analytics-ready datasets.
- Created Looker Studio dashboards and reporting datasets to operationalize key performance metrics and support business decisions.

Education

Old Dominion University | Norfolk, VA

Bachelor of Science in Computer Science | 12/2022
